## Relevant Experience

### Front End Developer

**Freelance // February 2022 - Present**

- Create webpage layouts with HTML5, CSS3, and JavaScript while consulting design specifications
- Take wireframe designs and turn them into functional, visually appealing websites that prioritize accessibility
- Optimize web pages for speed on mobile devices and cross-browser compatibility
- Solve technical issues that arise to ensure webpages appear accurately across all browsers

### HTML Email Developer

**Freelance // August 2022 - Present**

- Write highly proficient code using HTML and CSS, with a strong understanding of the latest responsive design principles
- Work with multiple types of email clients for mobile, tablet, and desktop platforms
- Make critical design decisions that can accommodate various formatting needs across various devices
- Troubleshoot technical issues quickly and efficiently to develop emails that are aesthetically pleasing and user-friendly

## Education

**Programming & Markup Languages**
JavaScript (ES6), HTML5, CSS3, SASS

**Tools & Platforms**
Git, Netlify, WordPress, Asana

**Design**
Figma, Adobe Photoshop

## Interests

Producing music, writing, playing basketball, reading, the outdoors

## Projects

### ↗ Keystone Music Conference Website

A website built with HTML5, CSS3, and JS that promotes an annual music conference teaching music-lovers how to master their craft.

### ↗ Qwestwind Digital Agency Landing Page

A minimal landing page developed with HTML5, Sass, and JavaScript that showcases the projects of the agency. It features lots of white space and a clean design for focuses on the projects themselves.

### ↗ Custom Portfolio Website

My personal portfolio website housing the above projects (and more), crafted with HTML5, SASS, and JS.
